ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and an Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Exception To The Animal Welfare Act

Non-human Primate Cage Cleaning

The combination of the size and weight of the monkey cage units in the primate rooms, and the difficulty in maneuvering the racks into the retrofitted rack washers create a potential safety hazard for employees. Removing these racks from the room with minimal door clearances, into the narrow corridor space, and up the incline to the rack washers is extremely difficult, even though the unused caging from these racks has been removed when possible to reduce the rolling weight. Due to these difficulties, primate caging is washed at one month instead of two week intervals. The cage bottoms and pans are washed twice daily.

The policy currently applies to all nonhuman primates within the facilities. (Currently 9 macaques.)
